

Excel Assignment 1 – Data Exploration Solution

This document explains each required Excel function with the formula, result from the provided dataset, and an example worksheet screenshot.

1. SUM, COUNT and AVERAGE

SUM: =SUM(D2:D35) → **10100**

AVERAGE: =AVERAGE(D2:D35) → **297**

TASK	FORMULA	ANSWER
Total price of all products	MAX(D2:D35)	10100
Average price of the products.	AVERAGE(D2:D35)	297

2. MIN and MAX

MIN: =MIN(D2:D35) → **30**

MAX: =MAX(D2:D35) → **1000**

TASK	FORMULA	ANSWER
Minimum price	MIN(D2:D35)	30
Maximum price	MAX(D2:D35)	1000

3. IF Function

Formula: =IF(D2>=500,"High Price","Standard Price")

If price is 500 or more, Excel returns High Price; otherwise Standard Price.

TASK	FORMULA	ANSWER
If function	IF(D2>=500,"High Price","Standard Price")	High Price

4. SUMIF and COUNTIF

SUMIF: =SUMIF(F2:F35,"Electronics",D2:D35) → 8050

COUNTIF: =COUNTIF(D2:D35,"<100") → 11

TASK	FORMULA	ANSWER
SUMIF	SUMIF(F2:F35,F2,D2:D35)	8050
COUNTIF	COUNTIF(D2:D35,">100")	22

5. LEFT, MID and RIGHT

LEFT(A2,2) extracts Day.

MID(A2,4,3) extracts Month.

RIGHT(A2,2) extracts Country Code.

Example: 28-JAN-US → Day=28, Month=JAN, Country=US

TASK	FORMULA	ANSWER
RIGHT- Product ID-Country Code	RIGHT(A2,2)	US
LEFT- Product ID-Day	LEFT(A2,6)	28-JAN
MID- Product ID-Month	MID(A2,4,3)	JAN
